Hi Alex,

It's been a little while since we last spoke. I hope you are doing well.

I wanted to pass along a quick update on one of our projects in the Town that will be going into construction in the Spring of next year. We are planning to make some improvements at the intersection of US 74 & Stanbeck Ferry Road. I have attached a graphic of what those improvements will look like. Basically, we will be doing some median and channelization work along US 74 along with a channelizing island on Stanbeck Ferry Road. Drivers will still be able to make a left turn onto Stanbeck Ferry Road if they are eastbound on US 74. Drivers will not be able to turn left off of Stanbeck Ferry Road to head east. This work will also create a right-in-right-out condition at both Lee Avenue and McLaurin Street. The project will result in the re-routing of some trips in the area – particularly semis and logging trucks. To accommodate those re-routed trips, we are planning on repaving and strengthening a few other roads in the area. The project includes resurfacing of US 74 in the limits of the left turn crossover construction. Stanbeck Ferry – Ice Plant Road will be resurfaced from US 74 to Morven Freight Line Road.

The project is currently scheduled for construction beginning sometime in March of 2017 and should be complete by Memorial Day.

If you have any questions, please let me know.

Thanks.

Stuart Basham
