MAYOR AND TOWN COUNCIL

The Town of Wadesboro has exceeded the test results for the following contaminants: Total Trihalomethanes and Haloacetic Acids. These two chemicals are monitored quarterly, as required by the State and Federal safe drinking water standards. Because of this Public Notice will have to be given to all Wadesboro water customers.

Since the Town of Wadesboro purchases all water from Anson County, we the town expect all water quality parameters to meet the federal drinking water parameters. I would hope that a letter be given to Anson County by this board, reflecting that The Town of Wadesboro expects the drinking water purchased from Anson County meets all guidelines as stated in the Water Purchase Contract just signed in 2017.

Sincerely

Hugh James

Public Services Director
